

JAZZY/GLAND

Maintain IP Integrity with
External Fixture Connections

The JAZZY Gland is an IP65-rated external connection gland that revolutionises how fixtures are installed. Designed to be mounted directly at the fixture entry point, the wiring block resides within the fitting, eliminating the need to open the housing during installation. This ensures the fixture's IP65 rating remains fully intact—ideal for harsh environments where moisture and dust protection is critical.

A trusted choice for installers seeking compliant, time-saving solutions on site.

Product Code	JAZZY/GLAND
Material	Polycarbonate
